## **DETAILED ACTION**

### ***Claim Objections***

Claim 11 is objected to because of the following informalities: in line 4, "magnet." should be corrected as – magnet --. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 11, lines 3-5 lack sufficient structure for the functional language of "bringing a fine metal powder producing material into flowing contact with...thereby adhering...to the surface of the ring-shaped bonded magnet."

Claims 13/11 and 13/12 lack sufficient structural support for the functional language of an electroplating treatment.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koike et al. [JP411003811A] in view of Ribitch [US 5,360,527].

Regarding claims 11, 13/11, 14 and 16, Koike et al. discloses a ring-shaped bonded magnet [12] having a film layer [16, 18] coating the entire surface [figure 1] of the magnet including a fine metal power [see constitution] coating an entire surface thereof.

Koike et al. disclose the instant claimed invention except for the outer layer being an electroplated fine metal coating.

Ribitch discloses an electroplating process for coating a fine metal power on a magnet [column 1, lines 24-39].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the coating process and material of Ribitch for the magnet of Koike et al. in order to reduce oxidation and contamination of the magnet.

Claims 12, 13/12, 15 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koike et al., as modified, as applied to claims 11 and 14 above, and further in view of Yamamoto et al. [US 5,649,362].

Koike et al., as modified, disclose the instant claimed invention except for the bonded magnet having a length to diameter ratio greater than 1.

Yamamoto et al. disclose a bonded magnet having a length to diameter ratio greater than 1.

It would have been obvious to a person having ordinary skill in the art at the time invention was made to use a length to diameter ratio greater than 1 for the magnet of Koike et al., as suggested by Yamamoto et al., for the purpose of securing mounting a shaft thereto and providing a ring shaped magnet roller.

***Response to Arguments***

Applicant's arguments with respect to claims 11-17 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
